

## FEP SHATTER RESISTANT COVERS FOR FLUORESCENT LIGHTS

*PROTECT YOURSELF, YOUR WORKFORCE AND YOUR PRODUCT WITH HOLSCOT SHATTER RESISTANT FEP LAMP COVERS*

As regulations become more stringent for the covering of lighting used in sensitive areas such as food preparation and public access areas like leisure centres, pubs, clubs, theatres etc., more and more organisations are having to consider how best to provide the protection required. The material of choice is FEP Fluoroplastic material. This provides:

- \* Enhanced Mechanical Protection
- \* A Life Span which will exceed all maximum quoted lifespans for the Standard Fluorescent Tubes of the major lamp manufacturers
- \* Stability in UV
- \* No discolouration
- \* No deterioration with age
- \* No effect of prolonged exposure to high temperatures

Holscot are specialists in FEP processing and can apply this covering to customers' free issue lamps or provide heat shrinkable sleeving to enable customers themselves to protect their lamps.

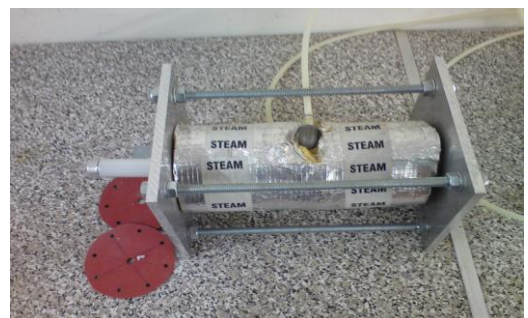

### **Range**

Holscot offers a stock range of covers for **T5, T8, T10 and T12** lamps which can be supplied as coils or cut lengths. As experienced extruders of Fluoroplastics Holscot also have the flexibility of providing our customers with custom extrusions for specific requirements

### **Fitting**

Holscot Lamp Covers can be fitted using a Hot Air Gun, a Tunnel Oven for multiple installations or a Steam Chamber – all of which can be obtained from Holscot if required.
